PODCASTS: Recording podcasts during the summer in cooperation with The Youth Council in Prievidza

- these will feature people who are experiencing violence either in connection to war or due to racism and xenophobia imposed on them in our country

GOAL

- to educate young people about the issues that various people (foreign or not) face in our country
- by raising awareness within the community, young people can take action and fight the issue of violence
- as young people, we want to motivate others to care more, and subsequently get them interested in creating similar activities
